PROGRAMME STRUCTURE

Programme Duration

The duration of MME Programme is two years. The programme has six contact sessions. Each contact session comprises of 10 days of face to face interactive teaching and learning. The programme is designed to be beneficial for candidates who are in mid-career level. It requires the participants to study for approximately two hours of notional student effort per day.

Credit Hours: The programme consists of 60 (US) credit hours.

Distribution of Modules

The programme is a modular system where credit hours will be awarded for each module passed. Six modules are identified each with its own contact session. After completion of modules the students are required to conduct educational research to qualify for masters. Each module includes contact sessions and on line assignments.

SNO	Codes	Title of Modules	Year	Credit Hours	
				Contact Sessions	Assignments

9	MME 709	Thesis			6
Total Credit Hours					60

All modules are compulsory and students will get credit hours after they have attended workshop and passed the written assignments.

Instructional Strategies

Constructivist approach shall be used as educational philosophy.. Problem based learning, task based learning and group discussions will be key components.

Contact sessions will include lectures, group discussions, self study periods and projects.

Medium of Instruction

All assignments and workshops will be in English language.

Workshop in each module with assignments

Approximately two years with 80 weeks of course work and remaining time will be spent for research. Students who fail to complete module will have chance to complete modules in next year as well.

Assignments

Assignments will only be given to students who will have attended workshop of that module.

They will be based on application of knowledge at higher order cognitive skills development.

Assessment

This programme is a modular system with credit hours. Student who acquires 60 credit hours and complete all mandatory requirements will be considered pass. The assessment will be both Formative and summative.

Research

Students are expected to work on a research project and write a dissertation on their chosen field of study. The research project shall be equivalent to six credit hours.
